## INTRODUCTION

2 Defendant ExxonMobil Corporation (“ExxonMobil”) has not met its burden of  
3 demonstrating that a stay of this case pending an appeal is warranted. ExxonMobil’s argument  
4 that a stay is warranted on the basis that it has “serious” legal arguments on appeal is  
5 unconvincing, particularly considering the dim view this Court expressed about each of  
6 ExxonMobil’s federal jurisdiction arguments. ExxonMobil’s claim of federal-officer  
7 jurisdiction—the sole basis for appellate review here—is without a scintilla of merit, as this Court  
8 already found. ExxonMobil should not be permitted to further delay the rightful remand of this  
9 case based on a jurisdictional argument that this Court remarked “verges on absurd.” (See  
10 concurrently filed Declaration of Elizabeth Rumsey (“Rumsey Decl.”), Mot. to Remand Tr. at  
11 6:3, Feb. 13, 2025.) Further, ExxonMobil utterly fails to establish that allowing this case to  
12 proceed in state court would result in irreparable harm. For these reasons, the stay should be  
13 denied.

## PROCEDURAL BACKGROUND

15 The People of the State of California, ex rel. Rob Bonta, Attorney General of California  
16 (“People”) filed this action against ExxonMobil and Does 1 through 100 on September 23, 2024.  
17 Dkt. 1-1, Ex. 1 (“Compl.”). ExxonMobil removed the action to federal court on November 1,  
18 2024, Dkt. 1, bringing state court proceedings to a standstill and, thereby, effectively staying  
19 commencement of any discovery. The People moved to remand the action to state court on  
20 December 9, 2024, Dkt. 19, and the Court heard that motion on February 13, 2025.

In advance of the hearing, the People approached ExxonMobil to ask whether, in the event the Court granted the People’s motion for remand, ExxonMobil intended to appeal and request a stay of the remand order. (*See* Rumsey Decl. ¶ 3, Exh. A.) If so, the People indicated they would oppose a stay but would like to explore whether the parties could reach an agreement regarding next steps in the litigation instead. (*Id.* ¶ 6.) The People understood that should the case be remanded, ExxonMobil intended to file several motions challenging jurisdiction as well as the sufficiency of the Complaint. (*Id.* ¶ 5.) As there was not sufficient time for the parties to discuss

1 the issue prior to the hearing, they agreed to request that—should the Court grant the motion and  
 2 issue an order remanding the matter to state court—the Court impose a “short administrative  
 3 stay” of the execution of that order. (*Id.* ¶ 6.) The purpose of that short administrative stay was to  
 4 allow the parties time to continue their discussion regarding next steps in the litigation should the  
 5 case be remanded to state court. (*Id.*)

6 This Court issued its remand order on February 24, 2025 (Dkt. 28, “Order”) and imposed a  
 7 42-day stay on execution of the order, that expires on April 7, 2025. (*Id.*) That stay is longer than  
 8 the People anticipated. (Rumsey Decl. ¶ 7.) On March 11, 2025, ExxonMobil filed a notice of  
 9 appeal of the remand order and moved for a stay pending appeal. The People strongly oppose any  
 10 further stay of the remand order.

## 11 ARGUMENT

12 Under 28 U.S.C. § 1447(c), “[i]f at any time prior to judgment it appears that the district  
 13 court lacks subject matter jurisdiction, the case shall be remanded.” *See also Demartini v.*  
*14 Demartini*, 964 F.3d 813, 818 (9th Cir 2020). “A stay is not a matter of right, even if irreparable  
 15 injury might otherwise result.” *Virginian Ry. Co. v. United States*, 272 U.S. 658, 672 (1926).  
 16 Rather, whether to issue a stay is within the court’s discretion and depends on the circumstances  
 17 of the particular case. *Nken v. Holder*, 556 U.S. 418, 427, 433 (2009) (citing *Virginian Ry. Co.*,  
 18 272 U.S. at 672-73). ExxonMobil has not shown that the circumstances justify an exercise of the  
 19 Court’s discretion to issue a stay. *See Nken*, 556 U.S. at 433–34.

20 Courts apply a four-factor test in determining whether a stay pending appeal is warranted:  
 21 “(1) whether the stay applicant has made a strong showing that he is likely to succeed on the  
 22 merits; (2) whether the applicant will be irreparably injured absent a stay; (3) whether issuance of  
 23 the stay will substantially injure the other parties interested in the proceeding; and (4) where the  
 24 public interest lies.” (Mot. for Stay (Dkt. 33, “Mot.”) at 3, citing *Leiva-Perez v. Holder*, 640 F.3d  
 25 962, 964 (9th Cir. 2011) (quoting *Nken*, 556 U.S. at 434).) Although ExxonMobil argues it is  
 26 entitled to the benefit of a “sliding scale” approach, where “a stronger showing of one element  
 27 may offset a weaker showing of another,” *see Al Otro Lado v. Wolf*, 952 F.3d 999, 1007 (9th Cir.  
 28

1 2020) (quotation omitted), it still fails to carry its burden as to any of the four factors. Therefore,  
 2 the motion should be denied.

3 **I. EXXONMOBIL HAS NOT SHOWN A LIKELIHOOD OF SUCCESS ON APPEAL**

4 ExxonMobil bears a demanding burden in establishing a likelihood of success on any of its  
 5 three federal jurisdiction arguments. This Court’s order characterized ExxonMobil’s argument for  
 6 removal on the basis of federal-officer jurisdiction as “fanciful,” and called its federal enclave  
 7 argument “misguided, to say the least.” And during the hearing, the Court called Exxon’s federal  
 8 maritime argument “a complete stretch.” (Rumsey Decl., Exh. B, Mot. to Remand Tr. at 10:6–9.)  
 9 Indeed, ExxonMobil implicitly concedes—as it must—that it is “weaker” on this element of the  
 10 stay test. (Mot. at 6, noting that it has made a “sufficient” showing on this element under the  
 11 sliding scale approach considering what it suggests is a “stronger showing” of irreparable harm.)  
 12 But ExxonMobil’s showing here is not just “weak,” it fails altogether. None of ExxonMobil’s  
 13 jurisdictional arguments has even a scintilla of merit. Even if the bar is as low as ExxonMobil  
 14 says it is (that is, that it need only show a “fair prospect” of success rather than make a “strong  
 15 showing [that it is] likely to succeed,” *Nken*, 556 U.S. at 434, ExxonMobil does not clear that bar  
 16 here.

17 **A. ExxonMobil Is Unlikely to Succeed on its Maritime Jurisdiction Argument**

18 ExxonMobil’s motion focuses primarily on the application of the “savings to suitors” (or  
 19 “Savings”) clause to California’s claims. (Mot. at 6–7.) But that clause only applies if maritime  
 20 jurisdiction exists in the first place—which, the Court has held, it does not. (Order at 11–12.)  
 21 Simply put, the central question for maritime jurisdiction is whether the People’s claims  
 22 regarding ExxonMobil’s deception about the recyclability of plastics have the requisite  
 23 “significant relationship to traditional maritime activity” (or “maritime flavor”) to fall within the  
 24 scope of admiralty law. *Owens-Illinois, Inc. v. U.S. Dist. Ct. for W. D. of Washington*, 698 F.2d  
 25 967, 970 (9th Cir. 1983). All other elements of the maritime jurisdiction test—whether the alleged  
 26 harms pose a threat to maritime commerce, whether the underlying conduct occurred in navigable  
 27 waters, and whether the claims involve a vessel—are an effort to ferret out that fundamental

1 issue. *See, e.g., id.* at 969–71. Here, the answer to all these questions is an unequivocal “no.” As  
 2 the People already explained at length in prior briefing on the issue (*see* People’s Mot. for  
 3 Remand (Dkt. 19, “Remand Mot.”) at 5–10; People’s Reply in Support of Remand (Dkt. 24,  
 4 “Reply”) at 2–6), and for reasons this Court already recognized, maritime jurisdiction does not lie  
 5 where the source of the pollution at issue is land-based, and there is no vessel involved. *In re*  
 6 *Mission Bay Jet Sports, LLC*, 570 F.3d 1124 (9th Cir. 2009) (“The ‘location’ prong … focuses on  
 7 whether the tort occurred on navigable water [satisfying the traditional test for maritime  
 8 jurisdiction] or whether injury suffered on land was caused by a vessel on navigable water  
 9 [satisfying the expanded test].”).

10 While ExxonMobil reiterates arguments made in its opposition to the People’s motion for  
 11 remand, it does not explain how they are “serious legal arguments on appeal.” (Mot. at 7.) Neither  
 12 of ExxonMobil’s cited cases supports the theory that a corporation’s public deception about the  
 13 recyclability of plastics—which bears no relationship to traditional maritime activity—could lead  
 14 to a finding of maritime jurisdiction. *Cf. Taghdomi v. United States*, 401 F.3d 1080, 1083–84  
 15 (9th Cir. 2005) (concerning Coast Guard’s allegedly negligent failure to communicate to rescuers  
 16 regarding a kayak in distress); *Kohlasch v. New York State Thruway Auth.*, 460 F. Supp. 956, 962  
 17 (S.D.N.Y. 1978) (concerning discharge into waterway that impaired navigational rights).  
 18 ExxonMobil attempts to obfuscate this issue by making incorrect assertions about the Savings  
 19 clause. But because ExxonMobil cannot establish any element of the federal maritime jurisdiction  
 20 analysis, the question of whether the Savings clause applies is irrelevant because the clause  
 21 pertains only if ExxonMobil could establish maritime jurisdiction in the first place.

22 Nevertheless, ExxonMobil suggests that there is a “serious legal argument” that the Savings  
 23 clause “should not have applied here” because the People allegedly waived the issue. (Mot. at 6–  
 24 7.) But as this Court explained, the People “repeatedly cited *San Mateo II* [*Cnty. of San Mateo v.*  
 25 *Chevron Corp.*, 32 F.4th 733, 764 n.25 (9th Cir. 2022)] in its motion, putting Exxon on notice

26

27

28

1 that the case would inform the remand analysis” and therefore did not waive the issue. (Order at  
 2 11.)<sup>1</sup> ExxonMobil does not cite a single case finding waiver on similar facts.<sup>2</sup>

3       ExxonMobil’s argument that the Savings clause “would be inapplicable on the merits” is  
 4 similarly groundless. (Mot. at 7.) ExxonMobil’s sole authority for this is a footnote in which the  
 5 *San Mateo II* court noted that certain arguments against application of the Savings clause had  
 6 been waived, 32 F.4th at 764 n.25, which is hardly support for ExxonMobil’s claim that these  
 7 waived arguments present serious legal questions on appeal. ExxonMobil has not cited even one  
 8 case that has adopted or at least addressed either of the propositions “left unaddressed” in *San*  
 9 *Mateo II*. (Mot. at 7.)

10       More importantly, *it does not matter*, because this Court expressly found no maritime  
 11 jurisdiction: “California’s claims are not maritime in nature.” (Order at 11; *see also id.* at 12  
 12 (noting, “maritime jurisdiction would be inapplicable anyway.”).) Neither this Court nor the  
 13 appellate court needs to resolve these Savings clause arguments. ExxonMobil’s strenuous efforts  
 14 to avoid application of the Savings clause only underscore that it has no other basis for federal  
 15 jurisdiction. ExxonMobil cannot establish that maritime jurisdiction lies, so it is not necessary  
 16 even to reach the application of the Savings clause.

17       **B. ExxonMobil Is Unlikely to Succeed on its Federal-Enclave Jurisdiction  
 18 Argument**

19       ExxonMobil claims it has a “fair prospect of success” on its federal-enclave jurisdiction  
 20 argument. (Mot. at 8.) To overcome the Court’s ruling regarding a lack of federal enclave  
 21 jurisdiction in this matter, ExxonMobil asserts that there is no “binding authority” affirming the

---

22  
 23       <sup>1</sup> Moreover, ExxonMobil concedes that the Ninth Circuit “has not addressed whether a  
 24 timely *generalized* objection to removal jurisdiction avoids waiver” (Mot. at 7, *italics added*);  
 25 here, the People made both a timely and *very specific* objection to removal on the basis of  
 maritime jurisdiction.

26       <sup>2</sup> ExxonMobil relies on *Nathanson v. Polycom, Inc.*, 2015 WL 12964727, at \*1 (N.D. Cal.  
 27 Apr. 16, 2015) for the proposition that an argument or issue is waived where it is raised for the  
 first time on reply. But at issue there was a wholly distinct basis for non-liability, and nothing  
 suggests that defendants there were “on notice” that the argument might come into play.

1 right of the People to disclaim conduct occurring or harms arising on federal lands in the  
 2 complaint. (Mot. at 8.) But ExxonMobil points to no authority supporting its argument, and there  
 3 is ample authority to the contrary. *See Order at 8* (citing *City of Oakland v. BP PLC*, 969 F.3d  
 4 895, 904 (9th Cir. 2020) and *Caterpillar Inc. v. Williams*, 482 U.S. 386, 392 (1987) for the  
 5 proposition that the plaintiff is “master[] of the claim”); *see also* People’s Reply at 7 (citing  
 6 *Fisher v. Asbestos Corp.*, No. 2:14-cv-02338, 2014 WL 3752020, at \*3 (C.D. Cal. July 30, 2014)  
 7 and other cases recognizing that a waiver of claims that would support federal jurisdiction  
 8 suffices to justify remand). Notwithstanding those authorities, ExxonMobil suggests that there is  
 9 a “fair prospect” that the Ninth Circuit would “reject such disclaimers,” noting that there is a rule  
 10 against “artful pleading to defeat removal by omitting to plead necessary federal questions in a  
 11 complaint.” (Mot. at 8, quoting *ARCO Env’t Remediation, L.L.C. v. Dep’t of Health and Env’t  
 12 Quality of Montana*, 213 F.3d 1108, 1114 (9th Cir. 2000).) The People can hardly be accused of  
 13 “artful pleading” here, where what is disclaimed is not a “necessary federal question” (which  
 14 ExxonMobil declines to identify), but a small fraction of the total conduct and total harm at issue.

15       Indeed, even if it were true that the People cannot disclaim conduct or harms on federal  
 16 lands, that would not change the analysis here. As this Court recognized, federal enclave  
 17 jurisdiction still would not lie because the People’s claims do not “arise” on federal enclaves. *San  
 18 Mateo II*, 32 F.4th at 749 (“[T]he Counties have not alleged that their claims are based on torts  
 19 taking place on a federal enclave.”). As this Court recognized, that is true regardless of whether  
 20 the focus of the analysis is ExxonMobil’s deceptive marketing (i.e., the conduct) or the resulting  
 21 harm to California caused by plastic pollution, neither of which have their “loci” on federal  
 22 enclaves. (Order at 9.) The fact that plastic pollution “touches on” federal enclaves is not enough  
 23 to change that. (*Id.*)

24       Citing *Durham v. Lockheed Martin Corp.*, 445 F.3d 1247, 1250 (9th Cir. 2006),  
 25 ExxonMobil reiterates its assertion that it is sufficient that “some” of the alleged injuries occurred  
 26 on federal enclaves. (Mot. at 8.) This is well-trodden ground. As the People explained in their  
 27 Reply in support of their remand motion (at 7), the *Durham* court’s observation that the plaintiff  
 28

here could have “attempted to remove on federal enclave grounds” because “some [its] claims arose on federal enclaves” is weightless not only because it is dicta, but also because there is clear authority to the contrary. *See, e.g., In re High-Tech Empl. Antitrust Litig.*, 856 F. Supp. 2d 1103, 1125 (N.D. Cal. 2012) (citing *Alvares v. Erickson*, 514 F.2d 156, 160 (9th Cir. 1975)) (rejecting that “federal enclave doctrine applies as long as some of the alleged events occurred on the federal enclave,” and reaffirming the “locus” standard); *Ballard v. Ameron Int'l Corp.*, No. 16-cv-06074, 2016 WL 6216194, at \*3 (N.D. Cal. Oct. 25, 2016) (denying removal in asbestos exposure case where, *inter alia*, only one of seventeen exposure sites was a federal enclave). *See also San Mateo II*, 32 F.4th at 749–750 (finding that federal enclave jurisdiction did not lie, not just because only “some” of the tortious *conduct* took place on federal enclaves, but also because plaintiffs cabined their injuries to non-federal lands, alleging harm only “to real property and infrastructure within their local jurisdictions”).

### C. ExxonMobil Is Unlikely to Succeed on its Federal-Officer Jurisdiction Argument

ExxonMobil acknowledges that this Court expressed “skepticism” of its argument for removal under the federal-officer doctrine. (Mot. at 8.) That is putting it mildly. ExxonMobil’s arguments about its predecessor’s alleged World War II-era rubber production “miss[] the boat entirely,” because the People allege “ExxonMobil promoted a deceptive marketing campaign to deceive the public about *plastic*.” (Order at 10.) The Complaint “is not about pollution in the abstract . . . .” (*Id.*)

Even if ExxonMobil could convince the Ninth Circuit that “rubber and plastic are more closely related than colloquial understanding might suggest” (Mot. at 9), this would not change the outcome of whether federal officer jurisdiction exists here. It is not necessary for this Court or the appellate court to determine the precise chemical relationship between rubber and plastic to find that ExxonMobil’s federal-officer removal argument fails. It fails even more fundamentally because ExxonMobil *does not even suggest*, let alone support, that the federal government directed ExxonMobil to engage in a decades-long campaign of public deception about the

1 viability of recycling as a solution to the plastics (or rubber) pollution crisis. That is the conduct  
 2 that is at the heart of each of the People’s claims, thus the “act” that is the focus of the federal-  
 3 officer analysis. 28 U.S.C. § 1442(a); *Jefferson Cnty. v. Acker*, 527 U.S. 423, 431 (1999) (the  
 4 availability of federal-officer removal turns on a “causal connection” between the *charged*  
 5 conduct and asserted official authority”) (emphasis added) (quoting *Willingham v. Morgan*, 395  
 6 U.S. 402, 409 (1969)).

7 In its efforts to avail itself of federal-officer jurisdiction, ExxonMobil attempts first to  
 8 revise the People’s Complaint to center ExxonMobil’s *manufacture* of plastic as the allegedly  
 9 wrongful conduct, then to stretch that distortion even further by equating plastic and rubber. But  
 10 the People nowhere allege in the Complaint wrongdoing in connection with ExxonMobil’s  
 11 production of plastic (or rubber). As is clear in the People’s pollution-related causes of action, it  
 12 is ExxonMobil’s wrongful *deception* that allowed it to quite literally flood the market with plastic  
 13 products, resulting in the alleged harms. In short, even if plastic is rubber and rubber is plastic,  
 14 there are even lower-hanging fruits to support the Court’s conclusion that federal-officer  
 15 jurisdiction does not lie in this matter.

## 16 **II. EXXONMOBIL WILL NOT SUFFER IRREPARABLE HARM IF THE CASE PROCEEDS IN 17 STATE COURT**

18 In addition to failing to show a likelihood of success on the merits, ExxonMobil has not  
 19 shown that it will suffer “likely irreparable injury” if the case proceeds in state court while its  
 20 appeal is pending. *Al Otro Lado*, 952 F.3d at 1007 (citing *Nken*, 556 U.S. at 434). ExxonMobil’s  
 21 burden regarding irreparable harm is even higher than it is on the likelihood-of-success prong,  
 22 because ExxonMobil must show “that an irreparable injury is the more probable or likely  
 23 outcome.” *Leiva-Perez*, 640 F.3d at 965. ExxonMobil’s unsupported and speculative arguments  
 24 do not meet this burden. *See Doe #1 v. Trump*, 957 F.3d 1050, 1058–60 (9th Cir. 2020).

25 Specifically, ExxonMobil argues that it would be irreparably harmed without a stay because  
 26 its statutory right to appeal its federal-officer jurisdiction claim under 28 U.S.C. § 1447(d) would  
 27 be “moot” if it were forced to litigate in state court while the federal appeal is pending. (Mot. at

1       4.) As many courts within this circuit have found, this generalized argument is meritless. *See,*  
 2       *e.g., City & County of Honolulu v. Sunoco LP*, No. 21-15313, 2021 WL 1017392, at \*1 (9th Cir.  
 3       Mar. 13, 2021) (denying stay pending appeal of remand order where defendants claimed  
 4       jurisdiction under the federal-officer removal statute); *Estate of Palfy v. Del Dios Care, LLC*, No.  
 5       22-cv-0048, 2022 WL 1017892, at \*5 (S.D. Cal. Apr. 5, 2022) (denying defendant’s request for  
 6       stay to “allow Defendant its right to appeal” remand based on federal-officer jurisdiction claim);  
 7       *Gavert by and through Gavert v. CF Modesto, LLC*, No. 1:21-cv-01719 2022 WL 705613, at \*1  
 8       (E.D. Cal. Mar. 9, 2022), *aff’d*, No. 22-15516, 2023 WL 4105203 (9th Cir. June 21, 2023) (same)  
 9       (collecting cases). Remand to state court neither prevents ExxonMobil from pursuing its appeal,  
 10      nor does it render ExxonMobil’s appeal “moot.” *See Washington v. Monsanto Co.*, No. C17-53,  
 11      2018 WL 9669810, at \*1 (W.D. Wash. Mar. 28, 2018) (denying stay as defendants “will be able  
 12      to pursue an appeal of the remand order—indeed, that appeal is currently ongoing”);  
 13      *Contemporary Servs. Corp. v. Landmark Event Staffing Servs., Inc.*, No. SA-cv-09681, 2017 WL  
 14      116319186, at \*5 (C.D. Cal. Nov. 3, 2017) (denying stay as “state court proceedings do not  
 15      prevent defendants’ appeal from being heard”). In fact, ExxonMobil’s appeal has already been  
 16      docketed, and a briefing schedule has been set.

17           As ExxonMobil concedes, any potential expense and inefficiency that could arise from  
 18      litigating in both federal and state courts do not rise to the level of irreparable harm. (Mot. at 5,  
 19      quoting *City & County of Honolulu*, 2021 WL 1017392 at \*2-3 (finding that litigation burdens  
 20      and possible inefficiencies if the federal court later finds the cases were properly removed would  
 21      not constitute irreparable harm).) *See also Al Otro Lado*, 952 F.2d at 1008 (“The key word in this  
 22      consideration is irreparable. Mere injuries, however substantial, in terms of money, time and  
 23      energy necessarily expended...are not enough.”) (quoting *Sampson v. Murray*, 415 U.S. 61, 90  
 24      (1974)).

25           Moreover, contrary to ExxonMobil’s assertions, the fact that removal was based in part on  
 26      the federal-officer removal statute, 28 U.S.C. § 1442, confers no special weight upon  
 27      ExxonMobil’s stay request. While section 1447(d) allows ExxonMobil a statutory right to file an

1 appeal of this court’s order denying federal-officer jurisdiction, it “does not provide for a stay of  
 2 execution pending such appeal.” *Carrillo v. Sela Healthcare, Inc.*, No. 5:21-cv-00150, 2021 WL  
 3 4556421, at \*5 (C.D. Cal. Sept. 8, 2021) (quoting *Poore v. State of Ohio*, 243 F. Supp. 777, 782  
 4 (N.D. Ohio 1965)) (denying stay of remand while defendant appeals denial of federal-officer  
 5 jurisdiction); *Blumberger v. California Hospital Medical Center*, No. 222-cv-06066, 2022 WL  
 6 18359101, at \*2 (C.D. Cal. Dec. 5, 2022) (“The fact that Congress has *allowed* a removing party  
 7 to seek appellate review before an action is remanded, does not *require* a district court to stay  
 8 automatically execution of a remand order” to allow the appeal). Nor does section 1447(d) bear  
 9 upon on the application of the well-established *Nken* factors, as well as the court’s sound  
 10 discretion, which govern the determination whether a stay is warranted. *See Carrillo*, 2021 WL  
 11 4556421 at \*5 (“As § 1447 does not provide for a stay of execution pending such appeal, the  
 12 grant or denial of a stay ‘rests squarely in the sound discretion of the district court.’”) (quoting  
 13 *Poore*, 243 F. Supp. at 782). The *Nken* factors—including the requirement to show a non-  
 14 speculative and probable irreparable injury—apply here in the same manner that they would  
 15 apply to any motion for stay pending appeal.

16 In support of its stay request, ExxonMobil cites primarily unpublished, out-of-circuit  
 17 district court decisions for the proposition that simultaneous court proceedings can lead to  
 18 irreparable harm because the state court could decide the merits of the claims before the appeal is  
 19 exhausted. Those cases are neither binding nor persuasive, and they conflict with the findings of  
 20 the many courts within this circuit which have ruled otherwise. *See, e.g., City & County of*  
 21 *Honolulu*, 2021 WL 1017392 at \*1 (explaining that “theoretical possibility that state court could  
 22 irrevocably adjudicate the parties’ claims and defenses while these appeals are pending also falls  
 23 short of meeting the demanding irreparable harm standard”); *Walek v. Boeing Co.*, 2016 WL  
 24 11757923, at \*4 (C.D. Cal. Mar. 14, 2016) (where defendant had not shown proceeding in federal  
 25 court was proper, the court could not find that proceeding in state court would constitute  
 26 irreparable harm). The prospect of simultaneous litigation, and adjudication of parties’ claims in  
 27 one court while claims are pending in another, is present any time litigation proceeds pending

1 appeal. These circumstances are unremarkable and do not support a demonstration of  
 2 “irreparable” injury.

3 The single Northern District of California case that ExxonMobil cites, *Hiken v. Dep’t of*  
 4 *Defense*, No. C 06-02812, 2012 WL 1030091, at \*2 & n.7 (N.D. Cal. Mar. 27, 2012), did not  
 5 concern a request to stay remand to state court, but rather an emergency motion for administrative  
 6 stay of disclosure of government information with “important national security implications.”  
 7 (Mot. at 4.) *Hiken* is completely inapposite, because in that case, the court found an irreparable  
 8 injury where “confidentiality [would] be lost for all time” if documents were “surrendered  
 9 pursuant to the [district] court’s order.” *See id.* (quoting *Providence Journal Co. v. Fed. Bureau*  
 10 *of Investigation*, 595 F.2d 889, 890 (1st Cir.1979)). Unlike here, the irreparable injury in *Hiken*  
 11 was not merely about having to litigate a case in two forums, but also about important national  
 12 security implications that are not present in this case.

13 Lastly, ExxonMobil’s arguments that its as-yet-to-be-filed motion to quash for lack of  
 14 personal jurisdiction in state court, and that court’s decision and potential appeal regarding this  
 15 as-yet nonexistent motion, will be concluded by the time the Ninth Circuit Court of Appeals  
 16 makes a decision regarding remand, are incredibly speculative. Those proceedings are still in their  
 17 infancy, including that discovery has not yet commenced. Meanwhile, as noted above, the Ninth  
 18 Circuit has already issued a briefing schedule with ExxonMobil’s opening brief due on April 22,  
 19 2025, and the People’s responsive brief due on May 22, 2025. ExxonMobil’s predictions about  
 20 the relative future progress of the state court proceeding and federal appeal consist of nothing  
 21 more than “conclusory factual assertions and speculative arguments,” which fail to meet the  
 22 burden of showing irreparable harm. *Doe #1 v. Trump*, 957 F.3d at 1059.

23 **III. THE BALANCE OF HARMS ANALYSIS FAVORS DENYING THE REQUESTED STAY AND**  
**ALLOWING THIS MATTER TO PROCEED IN STATE COURT**

24 The third and fourth factors, which require weighing any harm to the opposing party and  
 25 the public interest, merge when the government is the opposing party. *Nken*, 556 U.S. at 435.  
 26 These factors weigh heavily against a stay.

1       First, a stay of the remand order would substantially harm the public’s interest in preventing  
 2 further plastic pollution. As alleged in the Complaint, the plastic waste and pollution crisis is  
 3 ongoing and severe, and further delays in the efficient disposition of this case will only result in  
 4 further irreversible harm to California’s environment, wildlife, natural resources, and people. (*See*  
 5 Compl. ¶ 2.) Additional delay in the resolution of this case will amplify the irreparable harm to  
 6 the public caused by allowing ExxonMobil to continue deceiving the public regarding the  
 7 viability of recycling as a solution to the plastic pollution crisis while simultaneously rapidly  
 8 increasing its plastic petrochemicals production. *See Plaquemines Par. v. Chevron USA, Inc.*, 84  
 9 F.4th 362, 377 (5th Cir. 2023) (finding a strong public interest in preventing further loss of  
 10 Louisiana coastline due to climate change because the “protection of Louisiana’s coast is … a  
 11 matter of extreme urgency” and the “loss of the coast is an active ‘crisis’”). As highlighted in the  
 12 Complaint:

13       In 2022 alone, estimates of the amount of plastic waste leaked to land and into the  
 14 ocean in California ranged from 121,324 to 179,656 tonnes—the equivalent of  
 15 dumping 20 to 30 garbage trucks of plastic waste *per day* into California’s landscapes  
 16 and waterways.  
 17 (Compl. ¶ 2.) When the People seek to abate a public nuisance that is “an ongoing … crisis of  
 18 unprecedented dimensions,” the public interest weighs against a stay. *California by & through*  
*Harrison v. Express Scripts, Inc.*, No. 2:23-cv-08570, 2024 WL 841197, at \*6 (C.D. Cal. Feb. 28,  
 19 2024).

20       Second, a stay of the remand order would further delay the progress of the case, causing  
 21 considerable harm to the People as plaintiffs, who have an interest in the efficient resolution of  
 22 legal disputes. *See, e.g., Nken*, 556 U.S. at 435 (holding that “[t]here is always a public interest in  
 23 prompt execution” of the law); *Bd. of Cnty. Commissioners of Boulder Cnty. v. Suncor Energy*  
*(U.S.A.) Inc.*, 423 F. Supp. 3d 1066, 1075 (D. Colo. 2019) (“the public interest is furthered by the  
 24 timely conclusion of legal disputes....”). A stay would also harm the public interest in judicial  
 25 economy. *See Bradberry v. T-Mobile USA, Inc.*, No. C 06 6567, 2007 WL 2221076, at \*5 (N.D.  
 26 Cal. Aug. 2, 2007) (“Because Defendant does not have a strong likelihood of success on appeal, a  
 27

1 stay may not result in the conservation of judicial resources. Therefore, the public interest in  
 2 judicial economy does not strongly favor granting a stay.”). Discovery would be delayed, which  
 3 poses a substantial risk that critical evidence will be lost or destroyed. *See id.* at \*4 (explaining  
 4 that “the risk of lost evidence weighs against granting a stay”).

5 Here, the People have identified several key witnesses whose age and infirmity presents a  
 6 serious risk that they will be unavailable for depositions should discovery be further stayed. (*See*  
 7 Rumsey Decl., ¶ 4.) Further, crucial for the People’s claims under California’s consumer  
 8 protection laws, ExxonMobil’s postings and advertisements on social media sites are subject to  
 9 the Federal Stored Communications Act. *See* 18 U.S.C. § 2701, *et seq.* Section 2703 of this Act  
 10 appears to limit the time that social media entities can be required to preserve data to 180 days. 18  
 11 U.S.C. § 2703. There is thus a serious risk that this essential evidence may be destroyed before  
 12 discovery resumes should a stay be granted. This presents a probable and significant risk of harm  
 13 to plaintiff.

#### 14 CONCLUSION

15 For the foregoing reasons, ExxonMobil’s motion for stay of the remand order should be  
 16 denied, and the remand order promptly sent to the state court.

17 Dated: March 25, 2025
